

Dunes Animal Hospital
387 W. Steamboat Dr.
Dakota Dunes, SD 57049
Ph. 605-242-5412

Dr. Anema and staff of Dunes Animal Hospital would like to congratulate you on the new addition to your home. The first few months are important in your kitten's development, and a series of things should be done to help ensure its health.

For your convenience, we have prepared the following checklist to assist you in keeping track of these items. Please bring this list with you when you and your kitten come in for visits.

7-8 Weeks Old

- #1 Vaccination FVRCP
(Feline Rhinotracheitis, Calici, Panleukopenia and Chlamydia Psittaci)
- Intestinal Parasite (worm) examination
(Please submit a fresh stool sample. One teaspoonful is plenty.)
- Feline Leukemia Test
- Dewormer given – the CDC recommends all kittens be dewormed at least 2 times.

10-11 Weeks Old

- #2 Vaccination FVRCP
- Feline Leukemia Test (If not already completed.)
- Feline Leukemia Vaccination
- Dewormer given

13-15 Weeks Old

- #3 Vaccination FVRCP + Rabies
- Feline Leukemia Vaccination #2
- Intestinal Parasite Examination (Please submit fresh stool sample.)

6 Months Old

- Ovariohysterectomy (Spay-Female)/Castration (Neuter-Male)
(Optional pre-surgical blood screening and pain medication)

1 Year Old

- FVRCP + Rabies Vaccination (1 year booster)
- Feline Leukemia Booster
- Intestinal Parasite Examination (Please submit fresh stool sample)

We schedule vaccinations and surgeries by appointment, so please call ahead to schedule for the earliest available time.
